## Objective

As a web designer, I seek to provide my clients with practical solutions to their diverse objectives. In my experience, communication between designer and client is the most important aspect of the design process. My background in computer science, combined with my cutting-edge experience in web applications, helps me to deliver a state of the art product for every client.

## Projects

### *Pascalperich.com*

Design and development of entirely Flash based website for NYC Portrait Photographer.
